

7.Electricity Usage Monitor

```
#include<stdio.h>

float calculateBill(int units){
    float bill ;

    if(units <= 100){
        bill = units * 5;
    }
    else if(units <= 200){
        bill = units * 7;
    }
    else if(units <= 300){
        bill = units *10;
    }
    else{
        bill = units * 12;
    }
    return bill;
}

int main(){
    int units;
    float bill;

    printf("Enter the number of units consumed : ");
    scanf("%d",&units);

    bill = calculateBill(units);
    printf("Total bill amount is : %.2f",bill);
}
```
