

Number Counter

```
#include <stdio.h>

int main()
{
    int num;
    int positive = 0;
    int negative = 0;
    int zero = 0;
    int sum = 0;

    for (int i = 1; i <= 10; i++)
    {
        printf("Enter number %d: ", i);
        scanf("%d", &num);

        sum = sum + num;

        if (num > 0)
        {
            positive++;
        }
        else if (num < 0)
        {
            negative++;
        }
    }
}
```

```
    else
    {
        zero++;
    }
}

printf("\nPositive numbers = %d", positive);
printf("\nNegative numbers = %d", negative);
printf("\nZeros = %d", zero);
printf("\nSum = %d", sum);

return 0;
}
```
