

ATM Withdrawal

```
#include <stdio.h>

int main()
{
    int balance = 150000;

    int amount;

    int choice;

    while (1)
    {
        printf("\n\n  ATM MENU  ");
        printf("\n1. Withdraw Money");
        printf("\n2. Exit");

        printf("\nEnter your choice: ");
        scanf("%d", &choice);

        if (choice == 1)
        {
            printf("Enter withdrawal amount: ");
            scanf("%d", &amount);

            if (amount <= 0)
            {
                printf("Invalid withdrawal amount!");
            }

            else if (amount > balance)
```

```
{
    printf("Insufficient balance!");
}
else
{
    balance = balance - amount;

    printf("Withdrawal successful!");
    printf("\nWithdrawn Amount: %d", amount);
    printf("\nRemaining Balance: %d", balance);
}
}
else if (choice == 2)
{
    printf("Thank you for using ATM!");
    break;
}
else
{
    printf("Invalid choice!");
}
}

return 0;
}
```
